## COVID Period Occupancy Limits

Room occupancy limits may be adjusted to ensure safe distances.

Occupancy determined by SF/person recommendations will offer total occupancy, to include students and instructors.

Only when total occupancy number decimal is .9 or higher, number can be rounded up. In all other cases, per person quantity should be rounded down.

Occupancy, through SF/ person equations, is determined by dividing the recommended SF/ person into the total room square feet to establish the appropriate number of people who can occupy the room while maintaining 6' physical distancing.
